

## **Engineering Tripos Part IIA Project, GA4: Heat Pump, 2018-19**

### **Leader**

[Dr A J White](#) [1]

### **Timing and Structure**

Fridays 11-1pm, Tuesdays 9-11am plus afternoons

### **Prerequisites**

3A5 useful

### **Aims**

The aims of the course are to:

- To critically assess the value of heat pump technology as a way of reducing emissions of CO<sub>2</sub>.
- To design an experiment to measure the performance of the heat pump, and to make measurements which allow its performance to be modelled.
- To produce a model of the heat pump which is validated against the experimental measurements.

### **Content**

This project looks at the performance of a commercially available heat pump for domestic heating applications. Students will be required to design, build and perform an experiment to measure the performance of the heat pump, and build a model of the heat pump. This model will be used to explore the CO<sub>2</sub> saving which could be made by using heat pumps in a domestic heating application. Students will work in groups of 4 to design and perform the experiment. Individual tasks may be distributed amongst group members as decided by the group. Individual reports are required from group members, as well as group reports.

#### **Week 1**

Familiarisation with the equipment. Construction of a simple matlab model of the heat pump. Design of the experiment. First interim (group) report and review meeting (20%).

#### **Week 2**

Refine experimental plan, build apparatus and make measurements on the performance of the heat pump using an external water circuit.

#### **Week 3**

Compare models with performance values obtained from the experiment (interim report). Interim individual report (30%)

#### **Week 4**

Measurements of availability loss within the heat pump and refinement of initial model. Improved assessment of carbon saving. Final individual report (30%). Group presentation to share results with classmates (20%).

**Coursework**

Coursework	Due date	Marks
Interim Report 1 (group)	2pm Tuesday 14 May 2019 (review meeting Friday pm)	16 (group)
Interim Report 2	4pm Tuesday 28 May 2019	24  (individual)
Presentation	week 4	16  (group)
Final Report	4pm Friday 7 June 2019	24  (group)

**Examination Guidelines**

Please refer to [Form & conduct of the examinations](#) [2].
